HEBİL 157 EVLERİ, TÜRKBÜKÜ, BODRUM

'Mimarlık Topografya'nın Uzantısı'

Hebil 157 projesi de bu görüşün tam bir yansımasıdır.
Beş dönümlük araziye yayılan proje alanı, Hebil Koyu'nun sükunet dolu manzarasına bütünüyle hakimdir. Projeyi oluşturan 5 binanın beşi de birbirinden farklı. Bu farklılık, binaların kendilerine özgü konumlarından, sahip oldukları manzara açılarından ve çevreyle olan iletişimlerinden kaynaklanır. Bodrum Yarım adası karşısındaki Kos Adası'nda bulunduğu varsayılan Yanardağın püskürttüğü lavların soğuyup kristalleşmesinden oluşan Hebil 157 arazisindeki bina kütleleri, araziden adeta lavların fışkırma evresinde olduğu gibi topraktan büyük bir kuvvetle fışkırıp büyük bir sakinlikle tekrar toprağa kavuşur. Arazinin yanardağ etkisi kullanılan malzemelere de yansımıştır. Bina içlerinde volkanik bazalt taşı dışında başka taş kullanılmayıp, bina dışlarında, binanın toprakla birleştiği yerlerde araziden çıkan aglomeratlar kullanılmıştır. Toprağın içerisinden çıkıp havada süzülen Bodrum beyazı bina kütleleri, kendi içlerinde bir girdap hareketi yapar.

Bu girdap, merkezindeki asırlık zeytin ağaçları ile taçlanmaktadır. Kütlenin manzarayı kucaklayan cam yüzeyleri manzarayı mekânların topraktan çıktığı en derin noktalara kadar çeker. Proje bir yandan doğanın dinamik tarafını ele alırken diğer yandan bütününe bakıldığında sedatif bir etki yaratmaktadır. Bu sedatif etki arazide kullanılan onbin adet lavanta ile huzur veren bir terapiye dönüşür.

HEBİL 157 HOUSES, TÜRKBÜKÜ, BODRUM

'Architecture as The Extension of Topography'

Hebil 157 Houses is a manifestation of this idea.
Five unique villas are spread over five acres overlooking the tranquil panorama of Hebil Bay. Each villa is positioned strategically. All equally benefit from vast and wonderful views of the bay as they interact with the surrounding Aegean landscape, and the Mediterranean Breeze. The five villas are shaped and formed like the crystallized lava flows of the legendry Volcano Kos once located near the Hebil 157 site. Erupting out of the terrain dramatically, the vortexing "Bodrum White" masses merge into the background with serenity. Embracing the century old olive trees the central courtyard pays homage to the local flora. Large glass surfaces bring the picturesque landscape inside, blurring the division between inside and outside. The influence of the volcano is experienced both in materiality and spatial organization. The spaces are fluidly connected, rejecting compartmentalization. No stone other than volcanic basalt has been used in the interior spaces. For the external spaces, local volcanic agglomerate, the output of in-situ excavations has been used extensively.

The project investigates the rich relationship between the dynamics and complex forces of nature, which transforms into a relaxing therapeutic environment, ornamented with ten thousand lavenders.
